

Project Manager

Agomab is a young and dynamic biotech company developing medicine for patients with inflammatory and fibrotic diseases, including Crohn's disease. We are headquartered in Gent with offices in Antwerp and Barcelona; and laboratory facilities in Turin and Touro.

We are looking for a **Project Manager** to expand our project management team. The role will provide support to make things happen by ensuring proper planning, tracking, coordination and communication of R&D projects in a matrix, multi-national environment in close coordination with Project Leader and other departments within Agomab.

Who are we?

We are a highly motivated team, valuing ownership, trust, humility and courage in everything we do. We focus on pioneering science and getting results within an environment of continuous self-improvement.

What will you do?

- You will build the project plan and associated budget in close collaboration with the Project Leader, and with internal and external stakeholders
- Monitor project execution of all planned activities, from the timing and cost perspectives in close collaboration with internal experts and with finance
- Assist internal team members/experts with management of external suppliers (contracting, follow-up and invoicing)
- Support finance in budget forecast reviews in close collaboration with team members
- Ensure that project information is stored, shared and available to relevant stakeholders in the context of the project team
- Drive project team meetings agenda, execution, minutes and derived actions in close collaboration with the project leader
- Work in close collaboration with the project leader and team members in anticipating bottlenecks, scenario planning, risk management and risk mitigation planning.

Who are you?

- You have a bachelor's degree in biomedicine or equivalent with 5+ years of biotech or pharma industry experience or Master's degree or Ph.D. with 3+ years of biotech or pharma industry experience.

- You have working knowledge as project manager in R&D of new drugs. Prior experience in fibrosis indications will be a plus.
- You are a well-organized, systematic and rigorous person with good planning and communication skills. Proactive and used to work towards objectives.
- You have the ability to execute activities on multiple tasks running in parallel under challenges of time and workload.
- You are able to work in a multi-cultural environment, ready to manage a multi-national matrix organized project team, and to interact with international CRO/CDMOs.
- You are flexible to adapt to change, pay attention to detail without losing sight of overall objectives.
- You speak and write English fluently, and have a sound experience in using MS Office applications (Word, Excel, PowerPoint), with particular experience in MsProject.
- You are most of all a motivated and self-driven person, with the ability to independently manage your time

What we offer

- The opportunity to develop **pioneering science in a young biotech company**
- Challenging and innovative work environment as part of a driven team
- **Flexibility and responsibility** based in Barcelona or Antwerp, with remote working options that can be tailored for you
- Competitive salary and benefits
- An agile and fast paced environment

Interested in having a high-impact contribution in a growing company? **Send your application to HR@agomab.com** to the attention of Paul van der Horst, Chief Business Officer and join the team! Please be aware, Agomab is not working with any recruitment agencies so please reach out directly.
